

The Perini Navi 70m S/Y Sybaris is the largest sailing yacht ever built in Italy and represents leading edge innovation as it relates to both design and engineering in superyachts.

Sybaris boasts unprecedented deck space with a 117-sqm flybridge, a signature feature of a Perini.

Attention has been given to every detail onboard Sybaris with extensive titanium throughout.

The 87-sqm aft cockpit is protected by the overhanging fly bridge and curved glass windbreaks, and offers the same comfort and amenities that characterise all Perini yachts.

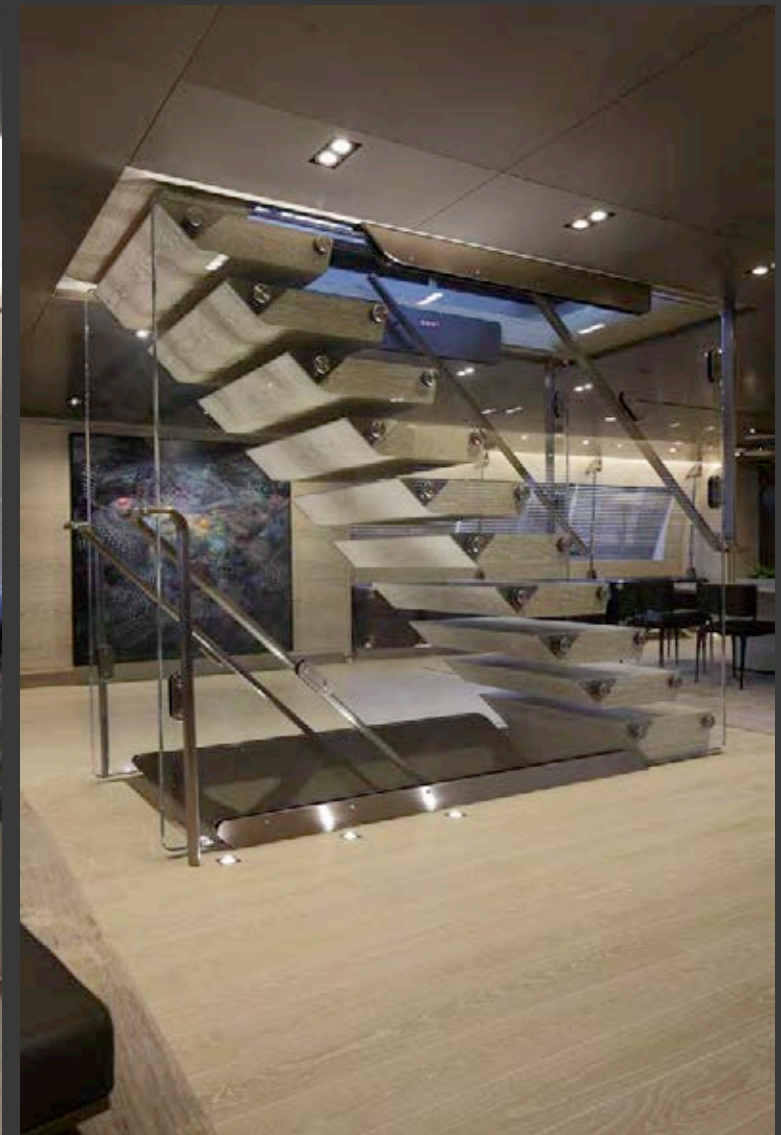

The open-plan layout, clean lines and custom-designed furniture made of the highest quality materials provide a crisp and contemporary style that acts as a muted backdrop to the bold works of art from the owner's private collection.

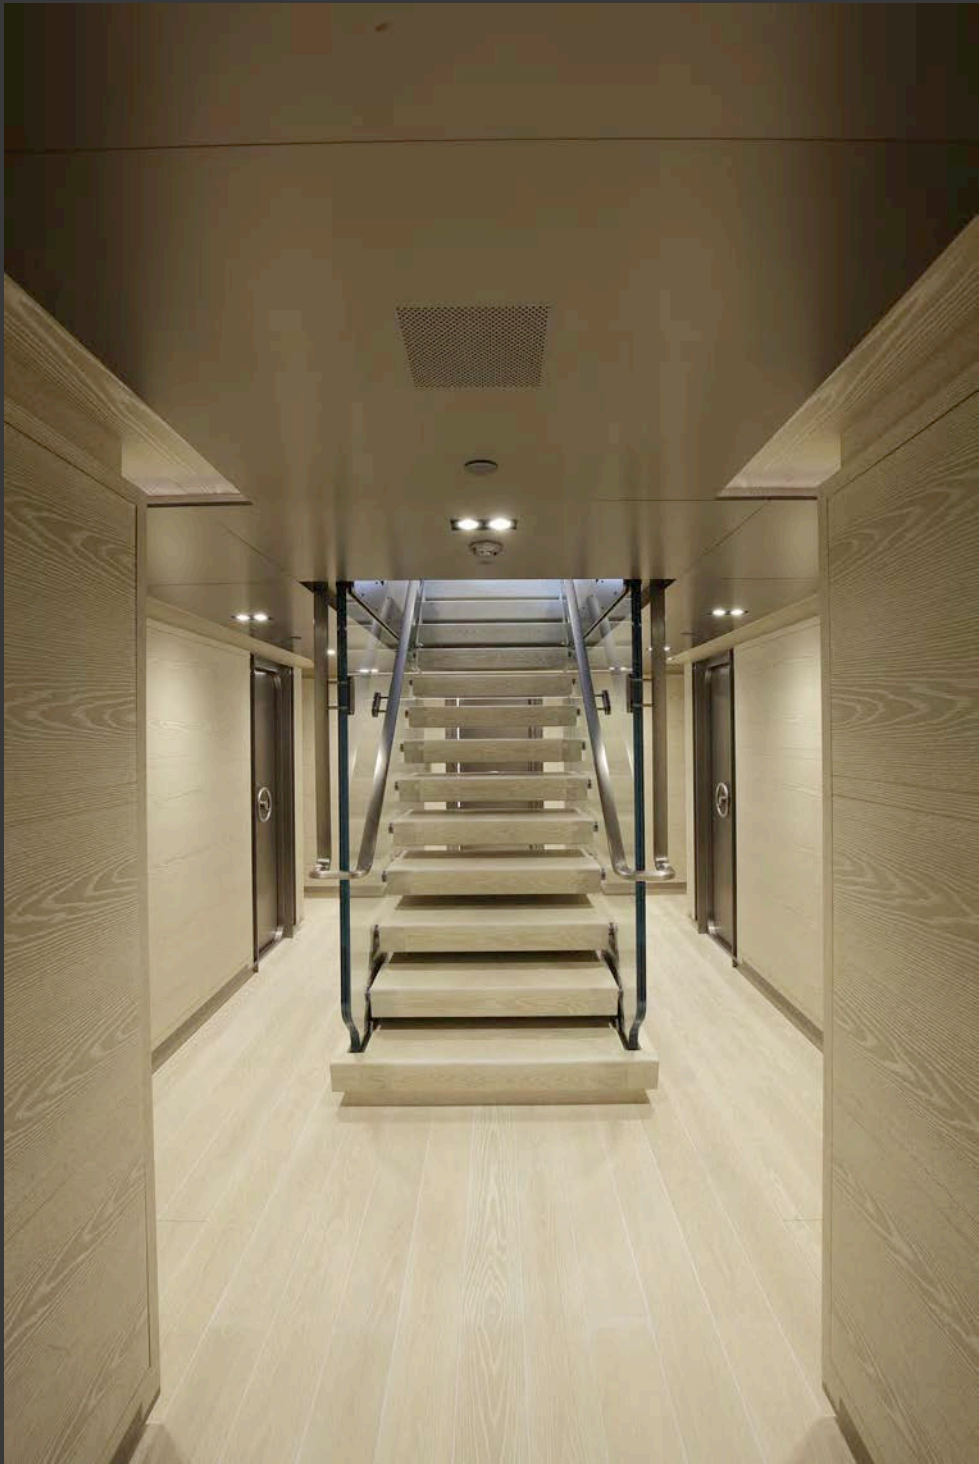

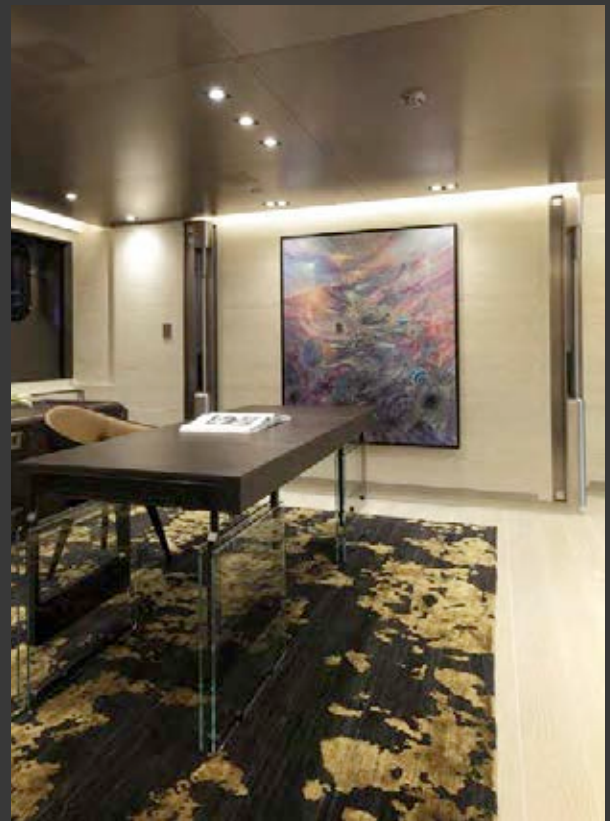

The 151-sqm main salon features sculpted pillars milled from solid titanium to support 'floating' Hermes designed travel trunks clad with alligator skin.

A dramatic feature on Sybaris are the staircases leading down to the lower deck and up to the fly bridge. Made of titanium with glass balustrades and treads of bleached American oak, the Class-approved laminated glass panels alone weigh over 600kg each, requiring reinforced beams fore and aft of the stairwell to support the structure.

The open-plan, full-beam owner's suite is unique with its king-size bed flanked by a study space and day lounge, and combined bathroom/wardrobe featuring washbasins and bathtub milled from solid stone.

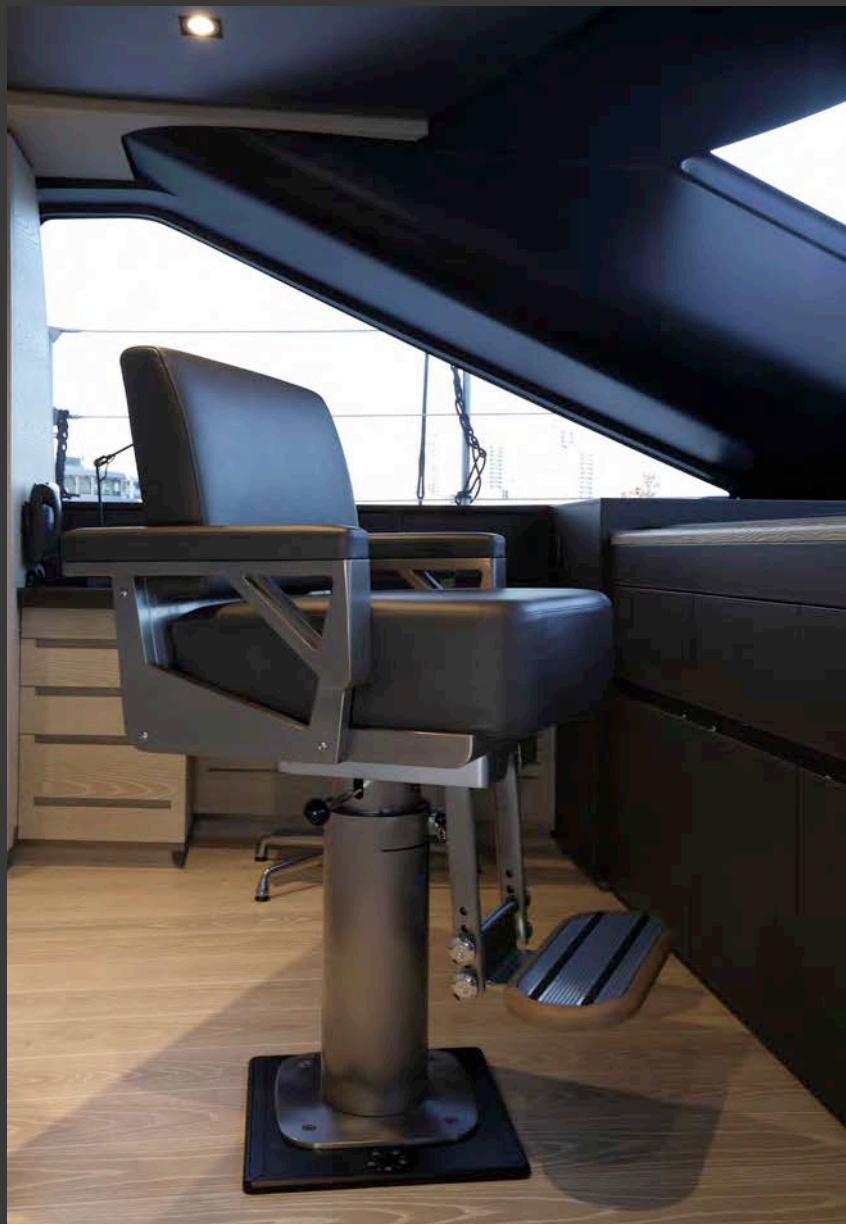

Throughout Sybaris, the gentle titanium tones are accented with satin-finished bronze details to blend seamlessly with the natural hues of the leather upholstery, bespoke textiles and marble surfaces.

The well-appointed crew quarters and galley feature many of the same bespoke materials used in the guest areas with the addition of a lacquered anthracite finish. Even the titanium door handles, custom designed to look like the watertight airlocks on submarines, are reproduced in the crew areas.

Mi, quiscias elenis sim faccum, sus si  
officiationi quae pedisit quunt volupta spellac  
eseditis aut quas et alibus dentibusam volores  
earum audi nonet est, omniet verum

Sybaris is equipped with two 120 kW variable speed generators – a first on a Perini Navi yacht – supplying electrical power via a DC bus to the vessel's main electrical grid with the potential to store excess power in lithium polymer batteries.

### Perini Navi 70m S/Y Sybaris

Length overall	70.00 m	229.6 ft
Waterline length	62.60 m	205.6 ft
Beam	13.20 m	43.4 ft.
Draught (keel up)	4.50 m	14.9 ft
Draught (keel down)	11.70 m	38.5 ft
Maximum displacement	916.50 T	
Cruising range under power	5.600 NM	
Main mast height	71.60 m	234,90 ft.
Mizzen mast height	60.90 m	200.00 ft
Classification	ABS ⚡ A1, Commercial Yachting service, — ⚡ AMS ACCU MCA LY3 Compliance
